How It Works

Step 1:

Businesses work with TechSF to identify workforce opportunities for a customized Apprenticeship. Apprenticeships can also serve as learning and development for internal candidates seeking growth opportunities.

Step 2:

Apprentices work towards on-the-job competency thresholds over 6-12 months, while simultaneously obtaining classroom learning credit towards an industry recognized credential.

Step 3:

Apprentices are typically partnered with a mentor and follow a work-based learning plan. Project-based learning can also be utilized. TechSF offers up to \$2500 reimbursement to help offset the cost of mentoring.

Step 4:

Apprentices are fulltime employees of the company, but typically earn less than a worker of the same classification. They receive a wage increase as they achieve competency.

“ We recognize that this partnership is one small step in helping to bridge what we see as a national digital divide. The value of this partnership cannot be underestimated and we hope to see it grow and others like it. ”

~Tiffany Apczynski
VP of Public Policy & Social Impact, Zendesk

Gabbi Sanchez,
Marketing Support Specialist
Zendesk Apprentice

Apprenticeship Tracks

- *Web Developer*
- *Network Security Administrator*
- *Graphic Designer*
- *Data Analyst*
- *Digital Marketing Associate*
- *Software Developer*
- *Project Manager*
- *Cybersecurity Analyst*

TechSF Registered Apprenticeship

Internship (Typical)

Term

Indefinite after completion of apprenticeship

3 – 6 months
