

**Working list of ideas to guide discussions. These are not formal recommendations.  
Harms addressed and Columns H-K to be discussed/revised/completed**

7 Major Categories of TF Ideas	Harms this idea will potentially address					Agencies/ Orgs that will need to be involved	Timeframe (Can this be imple- mented in 2021, 2022, later?)	Funds needed (\$, \$\$, \$\$\$)	How would this affect racial or econ inequi- ties?
	Quality of life for D6 residents & others who spend time there	Health harms from using drugs (e.g., od, addiction, disease)	Financial issues & opportunity costs for businesses & govt agencies	Some CJ responses to dealing may have negative effects on the community & PWUD	Harms associated w/ being a dealer (e.g., violence, trauma)				
<b>Category A. Improving Coordination and Communication</b>									
Create coordinating body and strategy with community stakeholders, community based orgs, city agencies, others (support from outside funders?)	X	X	X	X	X				
Map and align existing harm reduction, outreach, safety, cleaning services	X	X	X						
Increase and formalize coordination across community safety programs with District 6 block safety groups	X		X						
Require a level of consistent engagement from police that is coordinated with other community organizations on the ground (e.g., change in how a department engages in community coalitions, and neighborhood efforts at a high level and on the ground)	X			X					
Evaluate TL Station capacity issues including staffing and operational challenges	X			X					
Create more on-going communication between D6 Station Captains	X		X	X					

Reform Community Policy Advisory Board to increase its effectiveness and connection to the community	X			X					
<b>Category B. Increasing Outreach</b>									
Outreach to people who sell drugs about service options (Get them services before they are arrested)	X	X			X				
Outreach to people who use drugs about treatment/service options	X	X							
Use public announcements/signage to let dealers know about the damage they are doing to the community	X	X							
Assign a community ambassador for every dealer in the street (amplify that program)	X				X				
<b>Category C. Enriching the Community</b>									
Allocate additional resources for community safety programs to maintain constant presence and take back targeted blocks/corners	X		X						
Shut down some streets to automobiles and/or changing traffic patterns/enforcement	X		X						
Provide grants or low-interest loans to local businesses	X		X						
Create a more connected and buzzing community through community development (will need to be more specific about community development)	X		X						
Implement environmental changes to beautify D6 (e.g., CPTED training, owed.org/sf shines?)	X		X						
<b>Category D. Providing Services for People Who Use and/or Sell Drugs</b>									

Increase low-threshold substance use treatment access	X	X							
Increase the continuum of care—make all treatment options available 24/7	X	X							
Provide more harm-reduction/safe use sites that incorporate/are coupled w/ low threshold treatment access	X	X							
Incorporate trauma-informed approaches and other evidence-based approaches into treatment, e.g., contingency management (incentive) approaches	X	X							
Couple drug treatment with supportive housing opportunities so that following treatment, people have a pathway to residential step-down treatment for up to 2 years (housing plus intensive outpatient treatment (9 hours a week)), if needed	X	X							
Provide more comprehensive services for youth and adults—employment services + substance use prevention and treatment services + MH treatment services, under one roof and for free (e.g., Homeboy Industries)	X	X				X			
Give sellers to have ready access to Naloxone and fentanyl testing strips		X				X			
<b>Category E. Increasing the Efficacy of Criminal Justice Responses</b>									
Implement a diversion program for first time sales arrestees without drug problems (a modified LEAD ? pre-plea court?)	X		X			X			

Creating a credible deterrent threat (which doesn't mean long, multi-year sentences) for repeat offenders who violate stay away orders with no drug problems (sometimes referred to as "professional dealers")	X		X						
Use focused deterrence & tipping point ideas to sequentially flip corners/blocks back to the community	X		X						
Implement the Drug Market Intervention (has been effective at reducing outdoor selling in some places, not all)	X		X						
Attempt to get those who come to the TL to buy drugs to make purchases elsewhere or via delivery	X		X		X				
Incentivize dealers to not use people with substance use disorders to hold their drugs/money/weapons	X	X	X						
Prioritize those selling bags of fentanyl and other synthetic opioids	X	X	X						
Target higher-level suppliers, believed to be organized and primary living outside of SF (Likely requires fed/interagency cooperation)	X								
With 699 OD deaths in 2020, this task force should be advocating the courts to impose significant jail time for dealers	X		X						
Dealers repeatedly arrested, while on OR, ACM, Bail, violating SA orders need to be held in custody until their next court date at a minimum.	X		X						

Judges making custody decisions, and DA's making recommendations to the courts, need to spend some time learning about the death and turmoil these dealers are bringing to the Tenderloin.	X		X	X				
Based on just pure reduction of harm, it makes absolute sense that this drug supply be interrupted as quickly as possible. The argument that this interruption creates risks for users has already been debunked because of the simple fact that the supply is unsafe already	X	X						
Enforcement and Consequences are a very important part of the formula. For addicted persons, it's doesn't have to be automatic jail. It can be a mandated, supervised probation with mandated drug treatment and/or close monitoring. Some jail time (few days, 1-2 weeks jail) for violating terms of probation. Some months for repeat offenders that commit same crimes to support drug use. Do not open diversion/alternative sentencing for repeat offenders (have open case(s) and commit another crime),	X	X	X					
Dealers should be treated completely separately, there should be a graduated scale of consequences, 1st-time Diversion for small quantities, 2nd time 1-week jail, repeat offenses jail/prison time, DA to request stay-away order, detainer upon arrests, State Prison for larger quantity/repeat drug dealing offenses.	X		X					
Possession of a firearm with possession for sale of drugs, mandatory hold/detainer, 6+ months jail and/or prison.	X		X					

**Category F. Addressing Structural Issues (esp. Systemic Racism and Poverty)**

Support reparations for African Americans	X		X		X				
Change drug laws (e.g., decriminalization, legalization)									
Defund the police (Will need to be specific about what this means)				X					
Practice restorative justice (Will need to be more specific)	X				X				
Address poverty and root causes	X	X	X		X				
<b>Category G. Monitoring Performance and Collecting Data</b>									
Have an independent body (e.g., the Office of the Controller) work with police, DA, and Sheriff's office to report information on drug sales arrests, prosecutions, and sentences (including time served) on a quarterly basis	X		X	X					
Ensure pilot/innovation projects are adequately funded for duration and resources necessary to ensure valid and reliable outcome/impact measures for the target community.	X	X	X						
Require SFPD to track and provide historical information for the last 10 years on the weights/types of drugs people who are accused of selling are arrested with, the type of arrest (buy/bust vs. observed sale vs. search warrant), the amount of money they have on them, their race, whether they had a weapon, and other related data points.	X		X	X
